

Pitch Deck

Save lives with medical data

Problem

Price is an important concern for people looking for medical services

Medical institutions can not make analysis on medical data due to lack of dedicated system

1 practitioner handles **10,000+ patients** and can not process all the physical health books

Medical institutions are not connected and can not share their **knowledge**

24 Cameroonians will die in **the next hour**, due to non existence of medical history

Solution

A web "open" API that provides access to personal medical data everywhere

Travel Safe

Take your medical data with you

Act Wisely

Make better decision

Share Knowledge

To tackle diseases more efficiently
